

Your Live Game Plan

Recovery mode. Built from YOUR 37-stream data — not generic advice.

Mike & Mishka · Sept 2026 · dashboard: Mac-Studio.local:8787 (phone on home wifi) or localhost:8787

The one number that broke your business: 17-second average watch time.

Benchmark is 90+. In your \$200–300k era the old algorithm didn't care. The **June 2026 update** started weighting watch time and retention hard — so the same short-watch rooms that used to print money now get throttled. **Every fix below serves one goal: get people to STAY past 90 seconds.** Fix that and the reach comes back.

What your data proves works (do more of this)

LEVER	YOUR NUMBERS	DO
Saturday	\$3,857 — your #1 day by a mile (Sun/Fri next; mid-week ≈ \$0)	Stack your best effort Sat, then Sun/Fri
Mornings + 3pm	7am \$1,290 · 10am \$1,087 · 3pm \$950 · 9am · 6am. Evenings weak.	Go live mornings & mid-afternoon — ignore "7–10pm" advice, it's wrong for you
Convert A Bench	\$1,668, ~\$238/stream (high AOV)	Keep it — your best per-stream earner
Back To School	\$1,514, 25 orders (impulse volume)	Winding down seasonally — ride it while it lasts
Nugget Ice	\$930, \$310/stream	Strong — keep in rotation
Jabberin' Jack / Halloween	\$584 in ONE stream, 15 orders	Halloween is ramping now — lean in hard
SKIL tools	6 streams, \$36 total (\$6/stream)	Drop it. Your data says no.

The Jackery situation (straight talk)

You've got the two hard things right: **Jackery is the #1 live product right now, and you already have a power-station crowd.** That's real audience-product fit. The only missing piece is the **flash sale (your biggest conversion lever), pulled until Monday.** So:

- **Don't burn the big Jackery push this weekend without the deal.** You'd be spending your best day (Saturday) on a handicapped offer. Save the hard Jackery push for **Monday+ when the flash sale is back** — run it in your morning windows.
- **This weekend, still do a Jackery DEMO segment** — educate, show it powering things, grow and warm the power-station crowd so they're primed when the deal returns. Just don't expect big conversion without the price.
- **Why they likely pulled it:** brands/target programs reallocate flash deals to creators who are *actively going live for them*. You didn't go live for them this week → likely why. The fix is exactly what we're doing: consistent scheduled lives = they keep giving you deals. Ask Monday, don't spiral on it.

Right now (the live you're about to do)

No Jackery deal, no plan — here's the call: **run a proven winner that still has a deal** (Halloween / Jabberin' Jack, Nugget Ice, or Convert A Bench). Skip SKIL, blenders, and dealless Jackery as the main.

Use this one to drill the fix. Your only job tonight is watch time: nail the first 90 seconds and reset the room every 10 minutes. Treat it as a retention rep, not a make-or-break. Log it in the dashboard.

The 90-second fix (this is the whole game)

- **First 5 seconds:** product in hand, mid-action, BEFORE you say hi. Visual hook, not "hey guys."
- **First 30 seconds:** the promise + a concrete number ("only a few left," "next 20 minutes") — point at the orange cart. Never say a price out loud.
- **Reset every 10 minutes** (most viewers have watched under 2 min): who you are + what's happening + the deal + point at the cart + welcome new folks.
- **Engagement bomb every 8–12 min:** "type 1 if you want the demo," giveaway, flash pin.
- **Cliffhanger before each segment:** "in 10 minutes I'm plugging a full fridge into this — stay."

Saturday game plan (your money day)

SLOT	PRODUCT	FOCUS
7:00 AM (60–90 min)	Halloween / Jabberin' Jack	Best hour + hot seasonal. Hard on the 90-sec hook.
10:00 AM (60–90 min)	Convert A Bench or Nugget Ice	Your proven per-stream earners
3:00 PM (60 min)	Jackery demo (or repeat top seller)	Warm the crowd for Monday's deal

3–4 short focused sessions beat one 8-hour marathon. Same hours on camera, but 3–4 fresh algorithm pushes at your best times — instead of one that dies at minute 20 and bleeds all day (which now teaches the algorithm you don't retain). End each session clean; don't grind a dead room.

When to end each session: log a check-in every 15 min in the dashboard. If it flips to **END — NOT CONVERTING** (past 45 min, no orders after a swap), run your best closer, pin your top 3, and end. Come back next slot. Ending clean never hurts you — grinding a dead room does.

You've done \$200–300k GMV/month before. The skill didn't leave — the rules changed. Win the first 90 seconds, show up on your proven days, and it comes back.
